Grand Jefe 8748 is the high weaning weight calf and he has never stopped. His EPD's for WW and YW are in the top 1% of the breed. He is 9% above the average of the group for gain, which he combines with style and thickness. His dam is an outstanding cow that blends several of the great pedigree in our herd. Big Mac has been a mainstay in producing bulls like Jefe Grand 8748. He has earned the right to be lot 1. He will produce progeny that will gain well and be extremely efficient. You are probably going to ask how we know that these cattle will be efficient. We know that the cattle that reach the finish line first simple are cheaper because they consume less feed per pound of gain. We are currently involved in a feed efficiency project with Cornell and feel our hypothesis is correct. Fast growing high growth cattle are more feed efficient.

Lot 2 has much to offer. His dam can be traced back to a full sister to Bieber Chiefton 3080. We have counted more than 150 trait leader positions from our herd and Trident 8876 is the result of these great cowlines. Anyone could breed profitable cattle with sires stacked in this pedigree like Robin Hood, Titan 6894, Design 1325-082, King Rob, Robust, L303, Abe Lincoln, and None Better. Titan 6894 sold to Alta Genetics South America last spring and will be used only via AI. This son is a really balanced bull excelling in all the right traits. He is in the top 1% for WW, top 2% for YW, Milk within the desired range, Total Maternal over 40, Stayability in the top 25%, and Ribeye in the top 15% of the breed. You'd be hard pressed to find a bull in any breed with these excellent traits.

The name says it all. You can drive the wheels off your truck searching for a bull with this capacity and thickness. We don't often try to predict what the ultrasound will indicate, but if this bull doesn't scan 20% or more above the average, we will be extremely surprised. His growth EPD's put him in the top 1% of the breed. His dam is an outstanding cow from the famed Mimi cow line that has produced the likes of Red Arrow, Sundance, Red Robber, Make Mimi, Top Money, and several great sons that sold through the Oates program. Oates Land and Cattle bought a half sister that has been a standout cow in their flush program. Mimi 6246, Sherman Tank 8775's dam, is a great cow with a heifer that sold to Lonkers in last year's sale. This cow line is one of the most coveted in our herd and in the breed. Bulls like Sherman Tank 8775 are the kind of bull that attracts people to the corral and the breed. We thought long and hard about whether we wanted to sell this young prepotent sire, but we felt it was critical to help our keep customers at the forefront of the beef industry.

It will be hard to find a string of bulls like this in almost any breed that are in the top 2% in the breed with reasonable maternal traits. This is the second son for Titan 6894 and again you will find his style and thickness hard to pass up. Dusty Red has awesome statistics with a 115 ratio for ADG and 115 ratio for WDA along with growth in the top 2% of the breed. His dam has an outstanding record with an average BW ratio of 101 and average WW ratio of 105. His maternal grandsire is an outstanding sire who produced a core of great daughters for us. Titan has produced an outstanding son in Lot 4.

We are always looking for a sire to produce the next generation of great sons and Bieber Boone 8000 is in the lead for the honors. Inamorado 8853 represents the next generation and we are betting that he will have many friends on sale day. This cow had a promising past and a bright future here at the ranch. She has posted an average WW ratio of 107 and had a son who sold as lot 72 last year to Kim Raugust, ND, a savvy bull buyer who knows value when he sees it. Lot 5 is in the top 3% of the breed for WW and YW EPD's and Ribeye EPD in the top 30%. His maternal sire is the undisputed muscle leader producing a pedigree that is stacked in favor of profitable production. By the way, Inamorado is Spanish for "loves the cows", and 8853 has shown us that he always notices the heifers when they go past his pen.

Blue Chip is an outstanding prospect with lot of hard data to back him up. His maternal brothers have been working in a couple of our most discriminating customer herds, Dennis Dehaan and DeH Land & Cattle. They purchased one of the first sons of this cow, and Flower 5966 has kept on producing since then. We have frozen and transferred a whole host of embryo from this cow and sold some of those resulting calves last year and are expecting more next year. Top Billing has produced consistent genetic packages and we fully expect this sons follow in his footsteps. Blue Chip 8821 has growth in the top 3% of the breed and Total Maternal above 40. His Ribeye is also on the top 30% of the breed plus a large scrotal size that translates to early maturing, cost effective females.

No surprises here. Chunk's dam has consistently had calves at the top of her contemporary group. His birth and weaning are in the top 20% of the breed. His YW is in the top 3% with milk right in the range that we feel is acceptable. You might ask yourself what we mean by "in the range we find acceptable." We feel that you can get too much milk in a herd, and have problems associated with too much milk. Those problems include substandard udders, hard keepers, and substandard re-breeding. We feel that one must match traits to the environment. Big Chunk does that quite well. His sire Bieber Big Mac 6393, has an outstanding record and his calves this year average a 93 on BW and a WW ratio of 102.

This Rambler son will end up with many friends on sale day. Gitano's EPD's for Ribeye and Marbling are in the top 35% of the breed. This package really puts it all together. His dam is a great cow, with a long history of and posted average ratios of 99 on BW and 107 on WW. Visitors frequently took notice of this cow here at the ranch because of her outstanding calf at side this past summer. Take a look at him and see if he fits the package you're looking for. Gitano is in the top 15% of the breed for YW growth.

This is the first son of Topper 7701 to sell, but there are many good brothers still to come. Harvey 8882's pedigree is stacked with great sires. He is line-bred Toper 830-23L. Toper 830-23L's dam has an average WW ratio of 110 and has had a son that sold to one of our oldest customers, Ralph Byron, ND. Ralph and his father, Alfred, have been coming to the sale for years to buy good bulls and females that go back to North Dakota and work hard for them. Harvey is in the top 2% of the breed for WW and YW growth.

Get your high-octane genetics here. Red Plow's pedigree is stacked with high growth and his dam is a half sister to the dam of last year's high selling bull, Bieber Montoya 8237. His dam has also produced sons in 2001 and 2002 who sold to two good friends and customers, Donnie Miner, SD and the second sold to Wade Tucker, SD. Red Plow posted a 119 ADG ratio and is in the top 3% of the breed for WW and YW growth. Use this bull on cows for an added punch of growth.
